Re: Protect League City's Health, Economy, and Citizens

Dear Mr. Miller:

As a business owner/manager in League City, I have invested much in the local economy, and I don't want that investment to be negatively impacted through an avoidable circumstance. I recognize the Army Corps of Engineers study stating the risk is high for downstream contaminant exposure during a too-long removal process.

I urge you to place a permanent cap on the San Jacinto River Waste Pits. The temporary cap has had no leaks since 2011, and I hope you can enhance this for future generations both near the Superfund site and cities like mine near Galveston Bay. Not only will this protect public health, but it will also enhance our local economy and provide further risk mitigation for future investments in our area. Please cap the waste pits now!

Sincerely,

(b) (6)
